

ANESTHESIA MACHINE END-OF-LIFE BULLETIN

Manufacturer: Draeger Medical Systems

Product Line: Aisys CS2 and Aisys Compact2

Bulletin Date: June 2024

Executive Summary

Draeger Medical Systems is announcing the end of technical support for the Aisys CS2 series anesthesia machines, effective December 31, 2026. This bulletin outlines the support timeline, available options, and recommended replacement pathway.

Critical Notice: All Aisys CS2 units currently in service will reach end-of-life (EOL) status on December 31, 2026. After this date, Draeger will no longer provide technical support, software updates, or spare parts availability on a guaranteed basis.

Product Information

Model	Serial Numbers Affected	Current Status	End-of-Support Date
Aisys CS2	All units manufactured 2010-2020	Extended Support Available Until 12/31/2026	December 31, 2026
	All units manufactured 2015-2021	Extended Support Available Until 06/30/2027	
Aisys Compact2	All units manufactured 2015-2021	Extended Support Available Until 06/30/2027	June 30, 2027

Support Timeline

Phase	Dates	Support Level
Current	Through 12/31/2026	Full technical support, software updates, spare parts
Extended End-of-Life	01/01/2027-12/31/2027	Limited support; spare parts on availability basis only
Obsolete	01/01/2028 onward	No support, no spare parts availability

Impact on Your Facility

After December 31, 2026, the following services will no longer be available:

- Preventive maintenance and calibration services
- Software updates and bug fixes
- Technical support via phone or field service
- Spare parts availability (valves, bellows, CO2 absorbers)
- Regulatory compliance support

Regulatory Implication: Facilities operating unsupported anesthesia equipment may face compliance challenges during regulatory inspections. Patients may also express concerns about equipment age and safety.

Recommended Actions

Immediate (2024-2025):

- 1. Conduct a full inventory of Aisys CS2 and Compact2 units at your facility
- 2. Assess replacement budget and capital planning timelines
- 3. Request quotations from Draeger for replacement systems (Aisys ONE or next-generation models)
- 4. Verify current maintenance contracts; confirm coverage through 12/31/2026

Near-Term (2025-2026):

- 1. Develop replacement plan aligned with OR schedules and budget
- 2. Schedule replacement installations to occur before 12/31/2026
- 3. Budget for operator training on new equipment (2-3 days per staff member)
- 4. Plan for increased maintenance on aging equipment during final year

Replacement Options

Draeger recommends the following replacement models:

Current Equipment	Recommended Replacement	Key Benefits
Aisys CS2	Aisys ONE	Improved patient monitoring, advanced ventilation modes, 10-year support commitment
Aisys Compact2	Aisys Compact ONE	Portable design retained, enhanced drug library, extended product lifecycle

Contact Information

For questions or to discuss replacement options:

- Draeger Clinical Support: 1-800-DRAEGER (1-800-372-3437)
- Regional Technical Manager: Available upon request
- Email: healthcare.support@draeger.com

This bulletin is based on synthetic product information created for training and demonstration purposes.
