

MECHANICAL VENTILATOR END-OF-LIFE ANNOUNCEMENT

Manufacturer: Philips Respironics

Product Lines: Achieva and Achieva PS Ventilators

Announcement Date: August 2024

Executive Summary

Philips Respironics announces the end of technical support for Achieva series mechanical ventilators effective December 31, 2026. These ventilators have been in service for 10-12 years and are being replaced by next-generation platforms with enhanced monitoring and connectivity.

Affected Product Lines

Ventilator Model	Manufacturing Period	Units in Field (Estimate)	Support End Date
Achieva v60	2012-2018	2,500+	12/31/2026
Achieva PS v80	2014-2020	3,200+	12/31/2026

Critical Timeline: All Achieva series ventilators will reach end-of-service status on December 31, 2026. After this date, Philips will not provide software updates, spare parts, or technical support.

Support Phases

Phase 1: Current (through 12/31/2025)

- Full technical support available
- Preventive maintenance via service contracts
- Spare parts availability for all components
- Software updates (if applicable)

Phase 2: End-of-Life (01/01/2026 - 12/31/2026)

- Limited technical support; response times may increase
- Critical spare parts on request (availability not guaranteed)
- No further software updates

Phase 3: Post-EOL (01/01/2027 onward)

- No technical support
- No spare parts availability
- Facility assumes all maintenance and repair risk

Clinical and Operational Implications

Key Considerations for Your ICU/Respiratory Teams:

- Extended repair times if equipment fails after 12/31/2026
- Inability to obtain replacement parts, forcing equipment retirement
- Potential regulatory compliance issues if unsupported equipment is in use
- Need for staff retraining on new ventilator platforms

Replacement Strategy

Recommended Approach: Phased Replacement by 2026

- 1. **Assessment Phase (Q4 2024):** Inventory all Achieva units; assess age, condition, and maintenance history
- 2. **Planning Phase (Q1 2025):** Evaluate replacement platforms; obtain pricing and lead times
- 3. **Budget Phase (Q1-Q2 2025):** Approve capital expenditure; plan financing if needed
- 4. **Implementation Phase (Q3 2025-Q3 2026):** Order and install replacement ventilators; conduct staff training

Recommended Replacement Models

Current Equipment	Replacement Model	Key Improvements	Support Period
Achieva v60	Philips Respironics V680	Cloud connectivity, touchscreen interface, enhanced lung-protective modes	10 years
Achieva PS v80	Philips Respironics V680 PS	All V680 features plus pressure support and spontaneous modes	10 years

Lead Time and Planning

- **Order Lead Time:** 8-12 weeks typical for ventilators
- **Installation Time:** 1-2 weeks per site
- **Staff Training:** 3-5 days of intensive training per clinical unit
- **Recommended Final Order Date:** September 2026 to ensure installation before EOL
